Subject: Water samples for 46764

...

We submitted two water samples today via fedex, 8106 8288 3020. For each sample there is two unpreserved, one nitric preserved and one sulfuric. Please let me or Sarah know if you have any questions.

We have one more field day planned for the first week of April which is also our cutoff point for additional water samples. However, the sample dates have straddled the wet weather and irrigation season so we have been able to collect at all our soil sampling sites. I appreciate your patience and hard work for this sampling program.

Dietrick
